CAS DATALOGGERS

Limited Time: Get 20% Off Geo Loggers For Education & Research Institutes

Rugged, robust and of the highest quality. A specialized family of Geotechnical loggers adds support for frequency measurements for vibrating wire sensors, while nearly all models offer support for SDI-12 and Modbus communications for smart sensors.

Now Through Jan 15, 2019 Education and Research Institutes Save 20% on Geotechnical Data Loggers. For further information contact a CAS Data Logger Application Specialist at **(800) 956-4437** or request more information.

How To Connect a Vibrating Wire Sensor

In our latest video, our Sales Mgr. Peter Martin gives a quick overview of how to use a dataTaker DT80G Geologger to measure a vibrating wire sensor. Learn how to set up the measurement using the dEX software. Then, easily view your data for analysis in either a numeric list or in a graph.
