CAS DATALOGGERS INVITES YOU TO UPGRADE YOUR GRANT SQUIRREL DATA LOGGERS

Trade In Older Loggers for New Model with Large Displays

We are now offering Grant Squirrel Series Mk 1 owners a discount to upgrade to an improved new model! Now you can trade in your older Squirrel series data logger for the latest version which features a fully-configurable large graphical LCD display and updated design.

Grant's handheld data loggers offer an out-of-the-box solution for a wide range of data logging applications. With the addition of this large new LCD screen, users can access the Squirrel's core functionality without the need for a PC connection. This makes data logging in the field much simpler and more convenient!

Just call or email us at sales@dataloggerinc.com with your Grant logger's serial number to start saving!

Upgrade to Large Graphical LCD Display:

The Grant Squirrel [SQ2020/2040 series](#) now includes an intuitive and easy-to-read graphical 128*97-dot LCD screen with clear and simple navigation, fully configurable via the integrated 4-button keypad. The screen size has been expanded from previous versions for greater information accessibility, replacing older alphanumeric displays.

Being able to see real-time data graphically plotted onscreen gives users peace of mind that their sensors are correctly connected and fully operational--great for extended recording periods!

Eligible Serial Numbers Include:

- [SQ2020 1F8](#) – KS1112002 or earlier
- [SQ2020 2F8](#) – KS1117025 or earlier
- [SQ2020 2F8 WIFI](#) – KS1116006 or earlier
- [SQ2040 2F16](#) – KV1113014 or earlier
- [SQ2040 2F16 WIFI](#) – KV1116011 or earlier
- [SQ2040 4F16](#) – KV1116010 or earlier

Log it All with Grant Squirrel!

Grant's standalone [SQ2020/2040 portable data loggers](#) are designed for

NEWS ITEM

mobile data logging applications where portability and stand-alone operation are a must. This makes them popular in environmental projects, industrial process monitoring, food manufacturing, research, and more.

Well-known for their lightweight yet robust construction and reliability, the latest generation of Squirrel data loggers features 24-bit ADCs for incredibly precise measurements. These highly flexible, multi-purpose loggers have 8 differential (16 single-ended) analog input channels for measuring Current, Voltage, Resistance and Temperature data, and 8 Event inputs.

For added convenience, these loggers can now be configured without needing to connect to a PC or laptop. It's easy to view logger status, setup and real-time graphical data in meter mode, all within minutes of powering on!

Convenient Data Collection and Transfer:

The Squirrel 2020/2040 series' large onboard memory can store up to 1.8 million readings and also retain up to 6 separate logger configurations. Logger memory can easily be extended by using removable MMC/SD cards. The logger is powered from internal cells or an external power supply connection.

The onboard RS232 communications features can be connected to a PSTN or GSM modem. SquirrelView setup and download software for a PC is provided FREE with the system to enable users to export stored data to their chosen PC-based application.
