New LAN-Wired Temperature Monitoring Kit from Accsense

Monitor Temperature in Refrigerators or Freezers with Alarm Capability

Do you need an easy way to monitor product temperature in **Refrigerators**, **Freezers** and **Walk-in Coolers**? **CAS DataLoggers** has an affordable and reliable solution. The **Accsense Refrigerator/Freezer Monitoring Starter Kit** includes everything you need to begin monitoring temperature, right out of the box! Forget about having to check the temperature yourself–our automated temperature monitoring systems protect your valuable product 24/7.

Gain Peace of Mind from Regulations and Audits!

Do you need a hassle-free way to monitor product temperature in **Refrigerators**, **Freezers**, **Walk-in Coolers**, **Ultra-Low Freezers** or **Cryos**? If you lose sleep worrying that your fridge or freezer might fail without you knowing until it's too late, an Accsense system can provide you with immediate notification.

With over 10,000 active users in **Life Sciences**, **Medical**, **Food, and Industrial** applications, Accsense offers a range of refrigerator and freezer temperature monitoring systems to meet any need or budget.

Accsense automated temperature monitoring systems continuously monitor and record temperature, send alarm notifications on temperatures or power outage, provide historical data for regulatory compliance, and offer you peace of mind.

Our LAN-Wired Refrigerator/Freezer Monitoring Kit includes:

- Everything you need to start remotely monitoring temperature
- Quick & easy setup straight out of the box
- View data online via web browser
- Download data for offline analysis
- Receive alarms via email, cell phone, pager, or landline. Send alarms to multiple locations!
- Power/Internet outage notifications
- Completely secure, with automatic data backups

Remote Monitoring Solution:

Accsense remote monitoring systems automatically send data to a secure server for storage. Accsense also lets users set up powerful alarms which send out email, pager or phone notifications whenever temperature or other values go out of specification. These wireless monitoring systems also send out Power or Internet outage notifications, so for example you can get a heads-up if your storage unit loses power on the weekend.

- Email, SMS and voice alarms for immediate notification
- Support for temperatures as low as -200°C to support all applications
- Support for FDA-compliant reporting

Users sign in using a standard web browser to retrieve reports and graphs, and can also modify the system configuration from anywhere an internet connection is available.

Our Kit includes:

- A2-05 LAN-Wired Sensor Pod
- E1-21 Temperature Probe
- E1-35 Glycol Temperature Buffer
- AC Adapter
- Ethernet Cable

The Data Logger Experts:

At CAS DataLoggers we have the broadest range of products that you will find anywhere. We can offer you:

- Models designed specifically for **Medical** and **Life Science** applications
- Systems with online cloud-based software – view data anytime, anywhere
- Compact devices for easy installation atop medical storage units
- And more!
