

VISIT CAS DATALOGGERS AT AHR 2020

THE WORLD'S LARGEST HVAC SHOW, FEB 3-5 IN ORLANDO

The World's Largest HVAC event is about to get underway—the annual [AHR expo](#) is returning to Orlando, FL on Feb 3-5th. CAS DataLoggers Sales Mgr. Peter Martin is proud to attend along with Japan's #1 datalogger manufacturer—T&D! Come visit us at Booth #7490 to see our cutting-edge HVAC solutions for performance validation, energy audits, and more!

With prices starting at just \$109, [T&D products](#) give businesses and organizations an affordable way to record and monitor a wide variety of parameters.

SAVE TIME AND MONEY - GO WIRELESS!

Are you working on an [HVAC application](#) such as temperature monitoring in offices, humidity recording in wine cellars, or logging CO2 levels in schools? T&D Wireless data loggers are popular with our customers due to their ability to automatically upload data to T&D's free cloud storage service, saving time otherwise spent retrieving data. Their wireless capability sends readings to the cloud for later analysis, sharing, and presentation.

T&D data loggers can monitor several common environmental parameters including Temperature, Humidity, and CO2. Other T&D logger models can monitor additional parameters such as current, voltage, event, and more.

CHECK DATA OR ALARMS FROM YOUR SMARTPHONE!

With T&D Wireless LAN data loggers, there's no need to gather manual recordings yourself. T&D dataloggers have automatic data retrieval capabilities that wirelessly send data to remote PCs and mobile devices in real-time.

[T&D TR-7wb data loggers](#) are 2-channel thermo recorders featuring Wi-Fi communication, bluetooth, and the ability to push data directly to T&D's free cloud storage. In Access Point mode, users can view recorded data directly from their smartphones and tablets without a network.

FREE CLOUD WEBSTORAGE SERVICE

The free T&D WebStorage Service provided along with T&D loggers gives you instant online access to your recorded data for monitoring, saving, analyzing, printing, and more! This service also allows for remote viewing, sharing, and usage of data by multiple parties, providing businesses with increased data transparency. User-friendly graph software is also included.

THE DATA LOGGER EXPERTS

CAS DataLoggers is a US distributor of HVAC monitoring solutions, specializing in data loggers. We have been in business for over 20 years and we want to help you select the most appropriate product for your application. We can also recommend sensors and transducers to go with the data logger, along with technical support on all our products.

To learn more about [T&D Data Loggers](#), or to inquire about our exhibit at AHR 2020, contact a CAS Data Logger Applications Specialist at **(800) 956-4437** or visit our website at www.DataLoggerInc.com.
